

About the Indiana Urban Forest Council

The Indiana Urban Forest Council (IUFC) promotes public understanding of the need for trees and other natural resources in and along parks, green space areas, streets and urban woodlots and assists Indiana communities in protecting, expanding, and improving their urban forests.

The Council is a broad-based volunteer organization dedicated to assisting the Indiana Department of Natural Resources, Division of Forestry, Community and Urban Forestry program, non-profit groups, and volunteer groups through educational programming.

About this Conference

This conference is an excellent opportunity for urban forest managers, interested citizens, arborists, urban planners, landscape architects, municipality staff and volunteers from environmental and urban forestry related non-profit organizations to come together with others interested in Indiana's urban forestry future.

This conference will introduce attendees to industry updates, networking and creative new approaches in urban forestry design.

Program Information
